OPEN DOOR

Open Door Learner Management is our solution which is tailored for a dynamic educational institution to assist with effectively managing learners from admission through to graduation. Open Door is highly scalable, providing a management solution from small to large educational institutions.

This solution is built using some of the best oracle technology, making it reliable, stable and scalable.

Perform ALL your administrative tasks using one dynamic software.

Open Door handles the core function of record keeping of all student and academic information and includes modules for: automating the entire admission cycle; maintaining comprehensive details of all students, tracking and managing enrolments, managing courses, competency evaluation, activity planning, student attendance, fee management, accommodation management and graduation.

Open Door easily integrates with key functional software as well as existing student information systems. It is a single software that manages all information in the institution enabling management to make better informed decisions and also focus more on strategic tasks.

You're in control.

With the increasing demands in the amount and frequency of data reporting for accountability and other purposes; Open Door provides quick and automated report generation from a centralized data repository. Open Door is an excellent resource optimization solution which every institution needs.
