

eSoftwaresolutions
Corporate profile

“The new breed of forward thinking strategist”

About eSoftwaresolutions

eSoftware Solutions (eS3) was established in South Africa, Gauteng by individuals with many years of experience in different fields of business: Information Technology, Business Consulting, Project Management and Software Development.

Our business model is based on partnerships, we will partner with your organisation to create a mutually successful relationship. Our clients leverage off our existing infrastructure and knowledge of particular business applications and markets. Our services are required and utilized by both large and small organizations in the private and public sector.

Our services include:

- The development of Information Technology Strategies;
- The design and development of business solutions;
- The hosting of business applications, to support you in the operational needs of your business.

Clients come to us because:

- They would rather concentrate on their core business and not Information Technology;
- They lack the skills to support their business application;
- Of the high cost of developing or purchasing a business application;
- They would like to penetrate new markets;

eSoftware Solutions is changing the way business is conducted in the Information Technology sector. Information Technology should be seen as a value added service to businesses and not a large operational cost. eSoftware Solutions is a Oracle Gold Certified partner and Microsoft partner.
